

B2B PURCHASE

FOR PROJECT PROCUREMENT

44 Hyva India expands hydraulic and tipping solutions to meet evolving industry demands

56 Vinni Chemicals offers advanced fuel additives and greases to increase operational efficiency

84 Engineered geosynthetics solutions for safer mining

SHIFT FROM VOLUME TO VALUE
The Indian infrastructure procurement story is entering a decisive phase. As investments surge, success is no longer defined by scale alone, but by lifecycle value, localisation, energy efficiency, digital uptime, and execution excellence across projects.

ACETRAX® tyres & tracks: Engineered for the toughest job sites

Engineered for reliability where failure is not an option, ACETRAX® tyres and tracks from Ace Ventura Tyres & Tracks deliver stability, traction and durability across the toughest construction and access applications.

Ace Ventura Tyres and Tracks specialises in the design, development & supply of ACETRAX®-branded innovative construction tyres & tracks. Ace Ventura has developed strong expertise in meeting diverse tyre and track requirements across applications.

When your equipment reaches heights over 100 feet, there's no room for compromise - especially when it comes to what keeps it grounded. Aerial Work Platforms (AWPs), including telescopic boom lifts, articulating boom lifts and scissor lifts, rely on the strength, stability and traction of ACETRAX® tyres to perform safely and effectively in demanding environments.

Trusted by professionals across a wide range of industries, ACETRAX® tyres are built to meet the specifications of leading AWP manufacturers. With fast shipping and expert customer support, Ace Ventura makes it easy to get the right tyre solution for your equipment, wherever the job takes you.

Ace Ventura offers a complete range of ready-to-fit foam-filled tyre & wheel assemblies, over-the-tire tracks and scissor lift assemblies, in addition to its wide range of other tyres and tracks, suitable for all machine models.

Ready to fit foam-filled tyre and wheel assembly

Tyre filling is a two-component, simple, reliable, and economical liquid Polyurethane. Foam Fill is designed to convert air-filled tyres into urethane-solid rubber-filled tyres, making them puncture-proof and maximising vehicle operating efficiency while minimising downtime associated with flat tyres.

Tyre failures are frequently caused by overheating due to underinflation, and our technology helps ensure tyres reach their full lifespan, thereby contributing to the sustainability of this high-wear component.

Features:

- Puncture-proof & maintenance-free
- Comfort ride with less fatigue
- Better traction and handling for the vehicle

Foam-filled tyre & wheel assembly is suitable for industrial equipment with a maximum operating speed of 25 km/hr.

Ready to fit scissor lift tyre & wheel assembly

Scissor lifts play a crucial role on construction sites and are widely used across industries for vertical elevation. When equipped with purpose-built ACETRAX® scissor lift tyres, they deliver the efficiency, stability and safety these applications demand.

Ace Ventura offers a wide range of scissor lift tyres in various tread patterns, suitable for multiple machines such as JLG, GENIE, HAULOTTE, DINGLI, etc. With the rapid increase in scissor lift machines in India over the last two years, Ace Ventura has scaled its inventory to stock over 500 ready-to-fit scissor lift tyres to meet market demand.

Features:

- High-quality rubber compound
- Bonded to rims
- Non-marking tread
- Extensively tested for durability

Over-tire-tracks (OTT)

Ace Ventura's Over-Tire-Tracks (OTT) tracks are built to deliver unmatched traction, stability and durability across

demanding terrains; from deep mud and loose sand to snow-covered or soft turf surfaces. Designed for seamless fitment on a wide range of skid steer loaders, these tracks significantly enhance performance while reducing tyre wear and ground pressure. Whether on construction, landscaping or agricultural

sites, ACETRAX® OTR tracks ensure machines stay productive and safe in all conditions.

Features:

- Hardened steel construction for superior strength
- Reinforced flotation profile for

reduced ground disturbance

- Modular, serviceable design for easy maintenance and minimal downtime
- Adjustable track length to suit multiple wheelbase sizes
- Rigorously tested for traction, endurance and tyre protection

Ace Ventura's OTT tracks set the standard for traction, durability and reliability in every terrain.

Innovative solution provider

Ace Ventura focuses on application-specific, outcome-oriented products and solutions to help machine owners and operators get the most out of their equipment in the most demanding conditions. Products are exported worldwide and are well accepted for their performance & value. ■
