ACETRAX® tyres & tracks – Engineered for traction, stability and uptime

Ace Ventura is expanding the role of tyres and tracks from basic running components to performance enablers, with ACETRAX® solutions focused on traction, durability, stability and uptime.

Ace Ventura Tyres and Tracks specialises in designing, developing, and supplying innovative ACETRAX®-branded construction tyres & tracks. Ace Ventura has developed strong expertise in meeting diverse tyre and track requirements across applications.

On demanding jobsites, equipment performance starts at the ground. ACETRAX® offers application-focused tyre and track solutions engineered for traction, stability, durability and uptime. From Ready-to-Fit Foam Filled Tyre & Wheel Assemblies for boom lifts to Over-the-Tire Tracks (OTT) that fit over existing skid-steer tyres for enhanced traction and flotation, ACETRAX® solutions help equipment perform confidently across challenging terrain.

Ace Ventura offers a complete range of ready-to-fit foam-filled tyre and wheel assemblies and Over-the-Tire Tracks (OTT), along with a wide range of tyres and tracks for diverse equipment and demanding applications.

Ready-to-fit foam-filled tyre and wheel assembly

Tyre filling is a two-component, simple, reliable and economical liquid polyurethane. Foam Fill converts air-filled tyres into urethane solid rubber-filled tyres, making them puncture-proof to maximise vehicle operating efficiency and minimise downtime associated with flat tyres.

Tyre failures often result from overheating due to underinflation, and our technology helps ensure tyres reach their maximum potential lifespan, supporting the sustainability of this high-wear component.

Features:

- Puncture-proof & maintenance-free
- Comfort ride with less fatigue
- Better traction and handling for the vehicle
- Foam-filled Tyre & Wheel Assembly is suitable for industrial equipment with a maximum operating speed of 25 km/hr.

Over-Tire-Tracks (OTT)

Ace Ventura's Over-Tire-Tracks (OTT) deliver unmatched traction, stability, and durability across demanding terrain, from deep mud and loose sand to snow-covered or soft turf surfaces. Designed for seamless fitment on a wide range of skid steer loaders, these tracks significantly enhance performance while reducing tyre wear and ground pressure. Whether on construction, landscaping, or agricultural sites, ACETRAX® OTT tracks keep machines productive and safe in all conditions.

Features

- Hardened steel construction for superior strength
- Reinforced flotation profile for reduced ground disturbance
- Modular, serviceable design for easy maintenance and minimal downtime
- Adjustable track length to suit multiple wheelbase sizes
- Rigorously tested for traction, endurance and tyre protection

Ace Ventura's OTT tracks set the standard for traction, durability and reliability in every terrain.

Innovative solution provider

Our approach has always been driven by one objective - to create tyre and track solutions that solve real challenges in the field. Through continuous product development, application expertise and a commitment to quality, Ace Ventura Tyres and Tracks is building ACETRAX® into a trusted global brand for equipment owners and operators who depend on performance.
